

With the renovation of "Kovačeva domačija" homestead, we managed to combine ethnographic and historical insight into our past.

The memorial plaque on the house and the museum part in "mala iža" (small room) speak about our famous ancestor, local man and national hero, Štefan Kovač, as well as about the hard times which even the local people could not avoid.

The memorial collection contains the album with the preserved documentation, which in 1973, when the house and its surroundings were proclaimed ethnographic and historical monument to the national hero Štefan Kovač, was exhibited in "mala iža".
